(Rev. 9/17)

**Instructions for Driver**

The simple eye test given by the SC Department of Motor Vehicles (SCDMV) determines if you have 20/40 vision or better. If unable to pass the SCDMV's vision screening you must have your eyes screened by an eye care professional to determine if your eyes meet the Department's vision screening requirements. Therefore, you are being asked to have your eyes screened by an eye care professional to determine if your sight can be improved by glasses or treatments. If glasses will make you a safer driver, your license will permit you to drive only while wearing them.

Please do not ask the SCDMV to recommend an eye care professional as they are forbidden to do so.

If you have any questions about how well you must be able to see to be granted the privilege of driving on the streets and highways of South Carolina, the Department personnel will be glad to answer them.

**Instructions for Eye Care Professional**

Any individual applying for an **initial** non-commercial beginner's permit or driver's license, or **transferring** his or her **state of record** to SC, or a driver whose record casts doubt on his or her ability to drive safely **must pass a simple vision test** by Department personnel. When more accurate measurements are needed, or when unusual eye defects are apparent, the individual is asked to visit an eye care professional. In some cases, a screening by more than one eye care professional is requested.

You must provide the reading results and complete all of the questions. The individual must meet the visual acuity standards without the use of a telescopic lens or other attachment. Provide any additional comments for any special circumstance that you feel should be considered for the SCDMV's evaluation. Use a separate sheet if needed and attach it to the form.

Kindly sign this report and give your professional number. For proper identification, have the individual screened sign the report in your presence.

No recommendations or suggestions as to which eye care professional to visit are given by Department personnel. Only reports from licensed eye care professional can be accepted. The eye care professional assumes no responsibility in making this report other than that of truthfully representing the facts.
